Let's Build Better Futures, Together.

1. About Spikedace

Building Better Futures Through Digital Transformation

Spikedace Infotech (India) is a Digital Transformation and ICT Solutions company dedicated to helping governments, enterprises, development organizations, and startups harness technology to create meaningful and sustainable impact. We design and deliver digital platforms that modernize operations, improve public and business services, and accelerate economic and social progress.

With a growing global footprint spanning Africa, Asia, the Middle East, Europe, and North America, we have successfully partnered with government institutions, educational organizations, healthcare providers, financial institutions, NGOs, and private enterprises to implement secure, scalable, and future-ready digital solutions.

Our expertise spans Digital Transformation Strategy, Enterprise Platforms, Artificial Intelligence (AI), Cloud Technologies, Geographic Information Systems (GIS), Mobile & Web Applications, Data Analytics, Automation, and Custom Software Development. By combining global technology expertise with a practical understanding of local challenges, we create solutions that enable organizations to innovate, grow, and deliver lasting value.

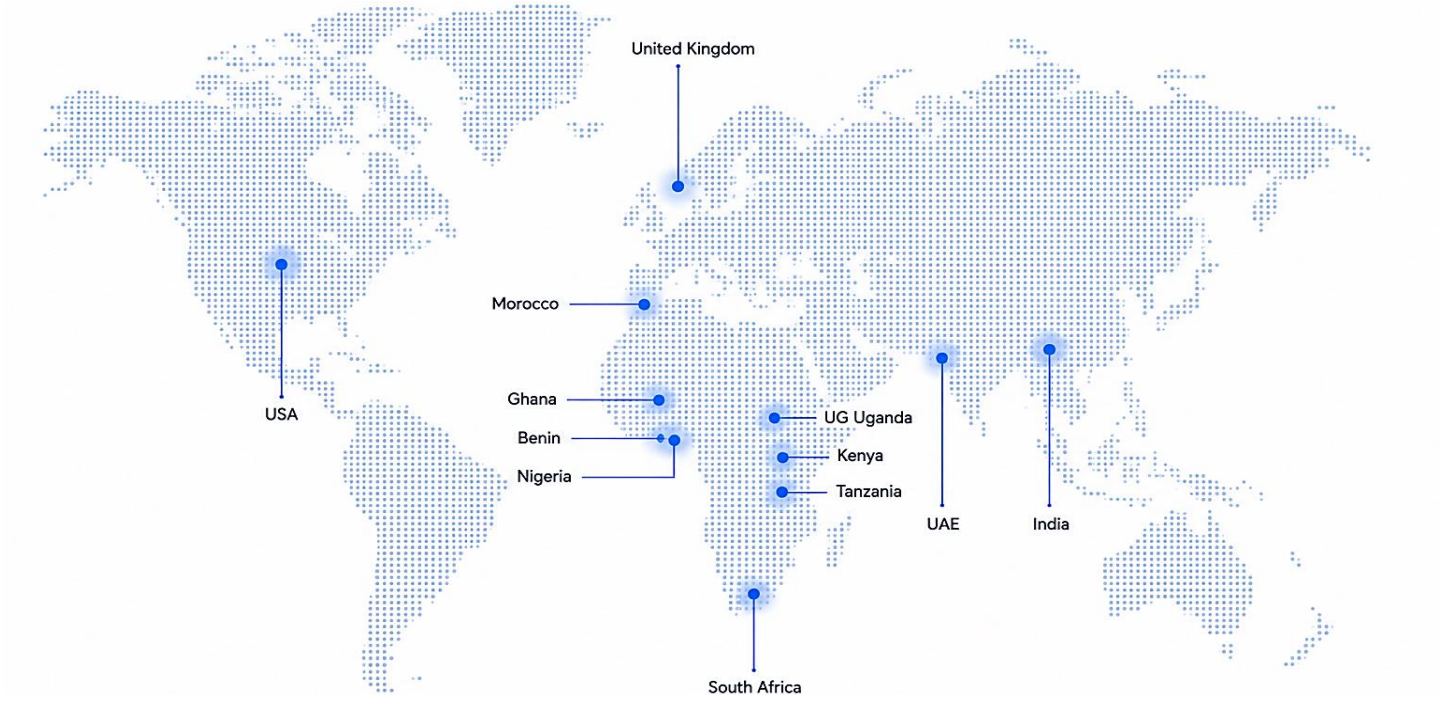
At Spikedace, we transform ideas into digital realities that empower organizations, strengthen communities, and build better futures together.

2. Global Footprints

Delivering Digital Transformation Across Continents.

Spikedace has successfully partnered with governments, enterprises, educational institutions, healthcare organizations, financial institutions, development partners, and private sector organizations across multiple countries. Our experience spans diverse industries, regulatory environments, and digital transformation initiatives, enabling us to deliver practical, scalable, and future-ready solutions tailored to local needs while leveraging global best practices.

From public sector modernization and education technology to enterprise platforms, healthcare systems, financial services, agriculture, logistics, and digital commerce, our growing international footprint reflects our commitment to creating meaningful impact through technology and long-term partnerships.



Industries We Serve

- Government & Public Sector
- Education & eLearning
- Healthcare
- Financial Services
- Agriculture
- Logistics & Mobility
- Retail & eCommerce
- Enterprise Solutions

12+ Countries | **8+** Industry Sectors | **56+** Digital Platforms | **Multiple** Strategic Collaboration

3. Digital Transformation Success Stories

Transforming Organizations Through Technology, Innovation, and Lasting Impact.

Across governments, enterprises, educational institutions, healthcare organizations, financial institutions, and development partners, Spikedace has successfully delivered digital transformation initiatives that solve complex challenges and create measurable value.

Our portfolio demonstrates the successful implementation of secure, scalable, and future-ready digital solutions across diverse industries and geographical regions. Each project reflects our commitment to combining innovative technologies with practical business outcomes, helping organizations modernize operations, improve service delivery, enhance decision-making, and accelerate sustainable growth.

The following success stories showcase **selected recent digital transformation projects** from across multiple industry sectors. While representing only a portion of our portfolio, these projects demonstrate our expertise, technical capabilities, and proven experience in delivering innovative, scalable, and impactful digital solutions that create lasting value for governments, enterprises, development organizations, and communities.

3.1 Transforming Government & Public Services

Building Citizen-Centric Digital Governments.

Governments around the world are embracing digital transformation to improve public service delivery, strengthen institutional efficiency, enhance transparency, and provide seamless citizen experiences. Spikedace partners with government institutions to design and implement secure, scalable, and interoperable digital platforms that support smarter governance and evidence-based decision-making.

Our government solutions span digital service delivery, e-Government platforms, regulatory systems, citizen engagement portals, management information systems, mobile applications, GIS-enabled solutions, workflow automation, data analytics, and integrated enterprise platforms. By leveraging modern technologies and user-centered design, we help public institutions deliver efficient, transparent, and future-ready services that create lasting social and economic impact.

PROJECT 01

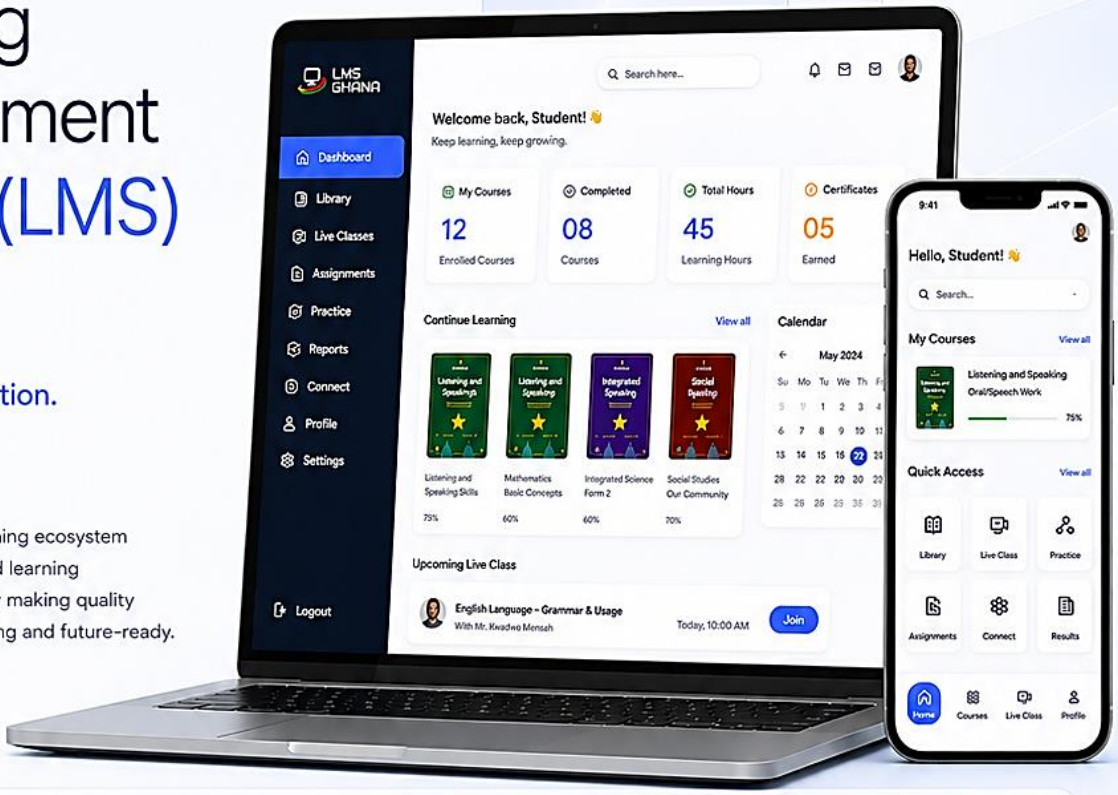
LMS GHANA

Learning Management System (LMS)

Ghana

Empowering Education. Enabling Futures.

A comprehensive digital learning ecosystem built to enhance teaching and learning experiences across Ghana by making quality education accessible, engaging and future-ready.



Web & Mobile Platform

Accessible anytime, anywhere

Virtual Classrooms

Interactive live teaching & learning

Cloud Powered

Secure, scalable & highly available

Digital Learning Content

Rich library of materials, courses & resources

Analytics & Reports

Data-driven insights for better outcomes

PROJECT OVERVIEW

The Learning Management System (LMS) connects students, teachers, schools and education authorities through virtual classrooms, digital content, assessments and analytics—delivering a seamless teaching and learning experience anytime, anywhere.

KEY HIGHLIGHTS

- Designed for Ghana's education ecosystem
- Supports classroom, hybrid and remote learning
- Mobile learning with offline access
- Secure, scalable and future-ready platform

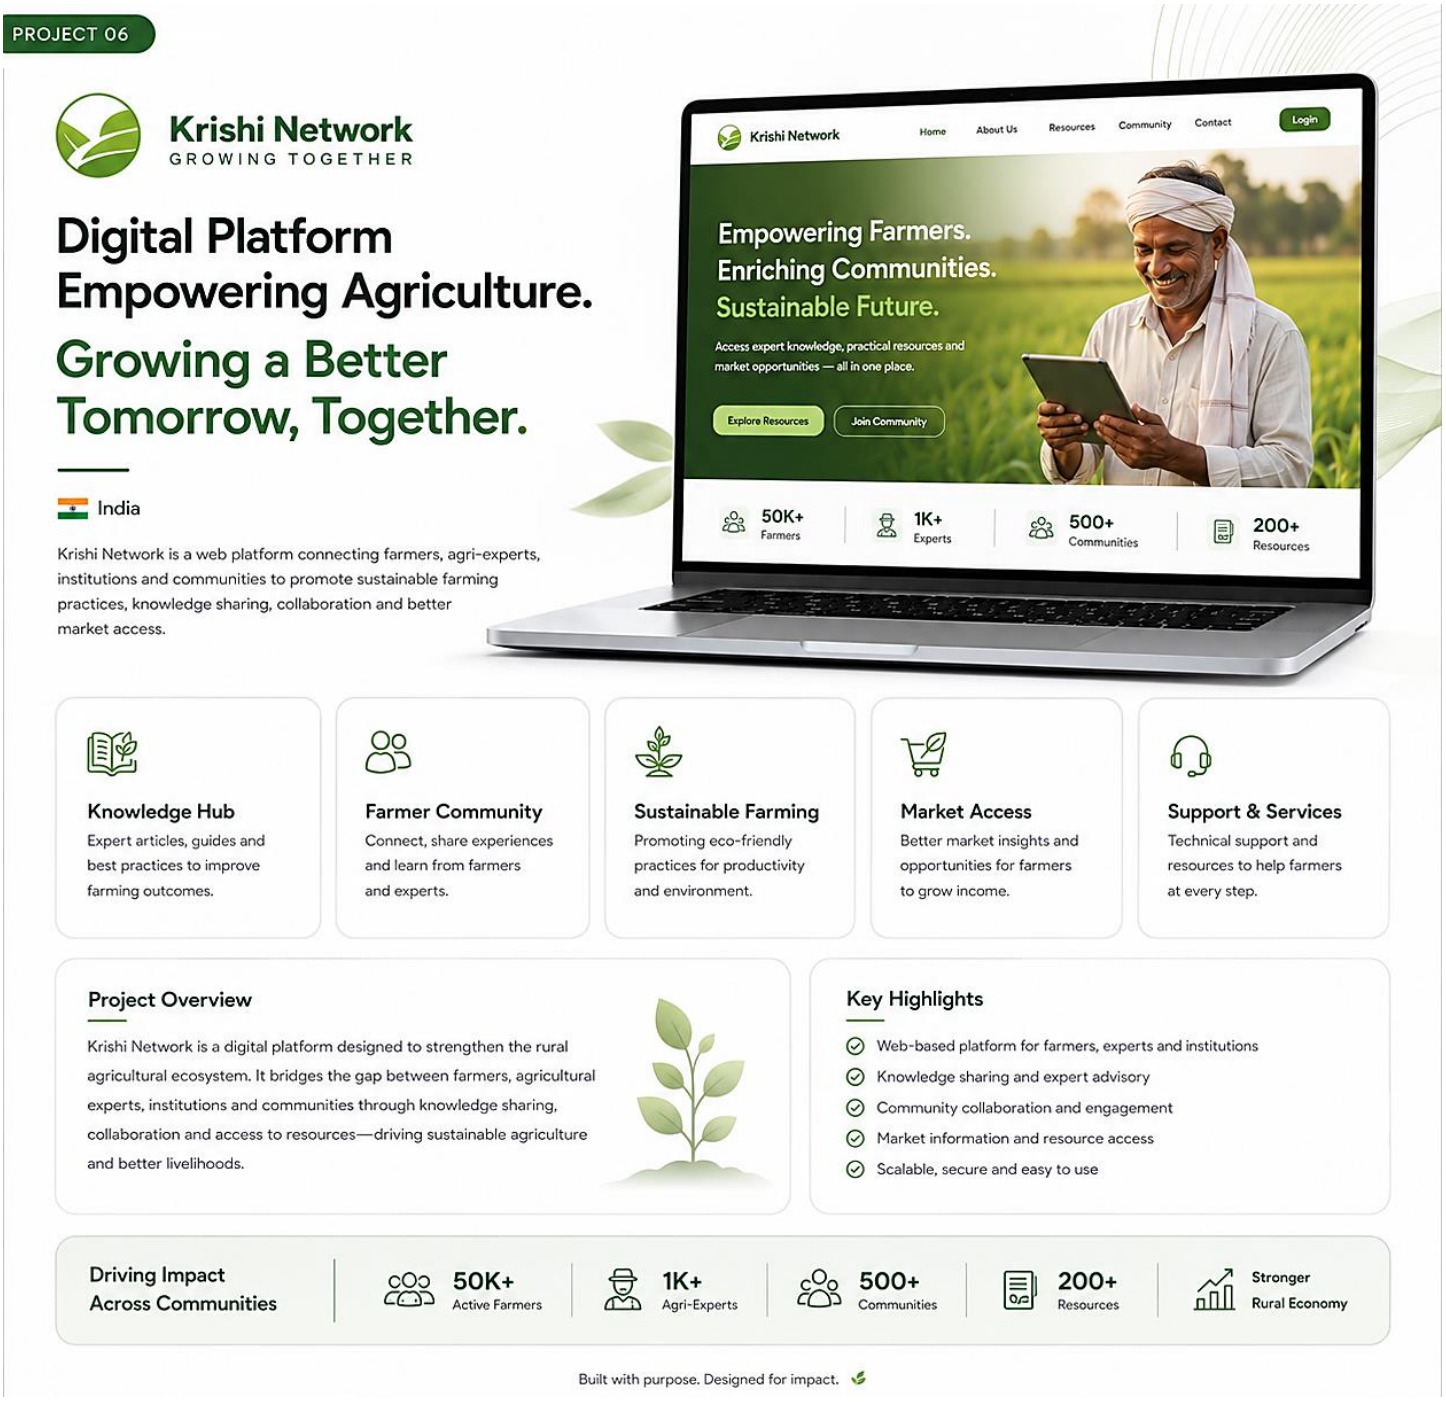
3.4 Modernizing Agriculture

Empowering Farmers Through Digital Innovation.

Digital transformation is enabling smarter, more connected, and data-driven agriculture by improving access to expert guidance, market information, and digital services. Spikedace develops innovative agritech platforms that connect farmers, agricultural experts, and mobile-first solutions. Productivity, strengthen decision-making, promote sustainable farming practices, and support the growth of resilient agricultural communities.



PROJECT 07

Kisan Sarathi

Expert Advice. Better Farming.

Expert Guidance. Smarter Decisions. Better Yields.

India

Kisan Sarathi is an expert advisory platform that connects farmers with agricultural specialists to solve crop problems, get personalized recommendations and improve productivity.

Ask Expert

Post your farming questions and get answers from verified agricultural experts.

Expert Network

Connect with experienced agronomists and specialists across various domains.

Smart Solutions

Receive practical, crop-specific solutions tailored to your problem.

Knowledge Base

Explore articles, guides and resources to enhance your farming knowledge.

Timely Alerts

Stay updated with weather alerts, advisories and important notifications.

Project Overview

Kisan Sarathi empowers farmers by providing instant access to expert agricultural advice. The platform simplifies the process of problem diagnosis, offers actionable solutions and builds a strong bridge between farmers and agricultural experts—driving better decisions and improved yield outcomes.

Key Highlights

- Expert Q&A platform for crop and farming issues
- Verified experts across multiple agricultural domains
- Personalized recommendations for better outcomes
- Resource library with guides and best practices
- Easy-to-use web platform, accessible anytime
- Secure, reliable and farmer-friendly experience

Technology Stack

React.js | Node.js | Express.js | MongoDB | Tailwind CSS | AWS | Redis | JWT

Impact at a Glance

10K+	5K+	20K+	95%	Better Decisions Higher Yields

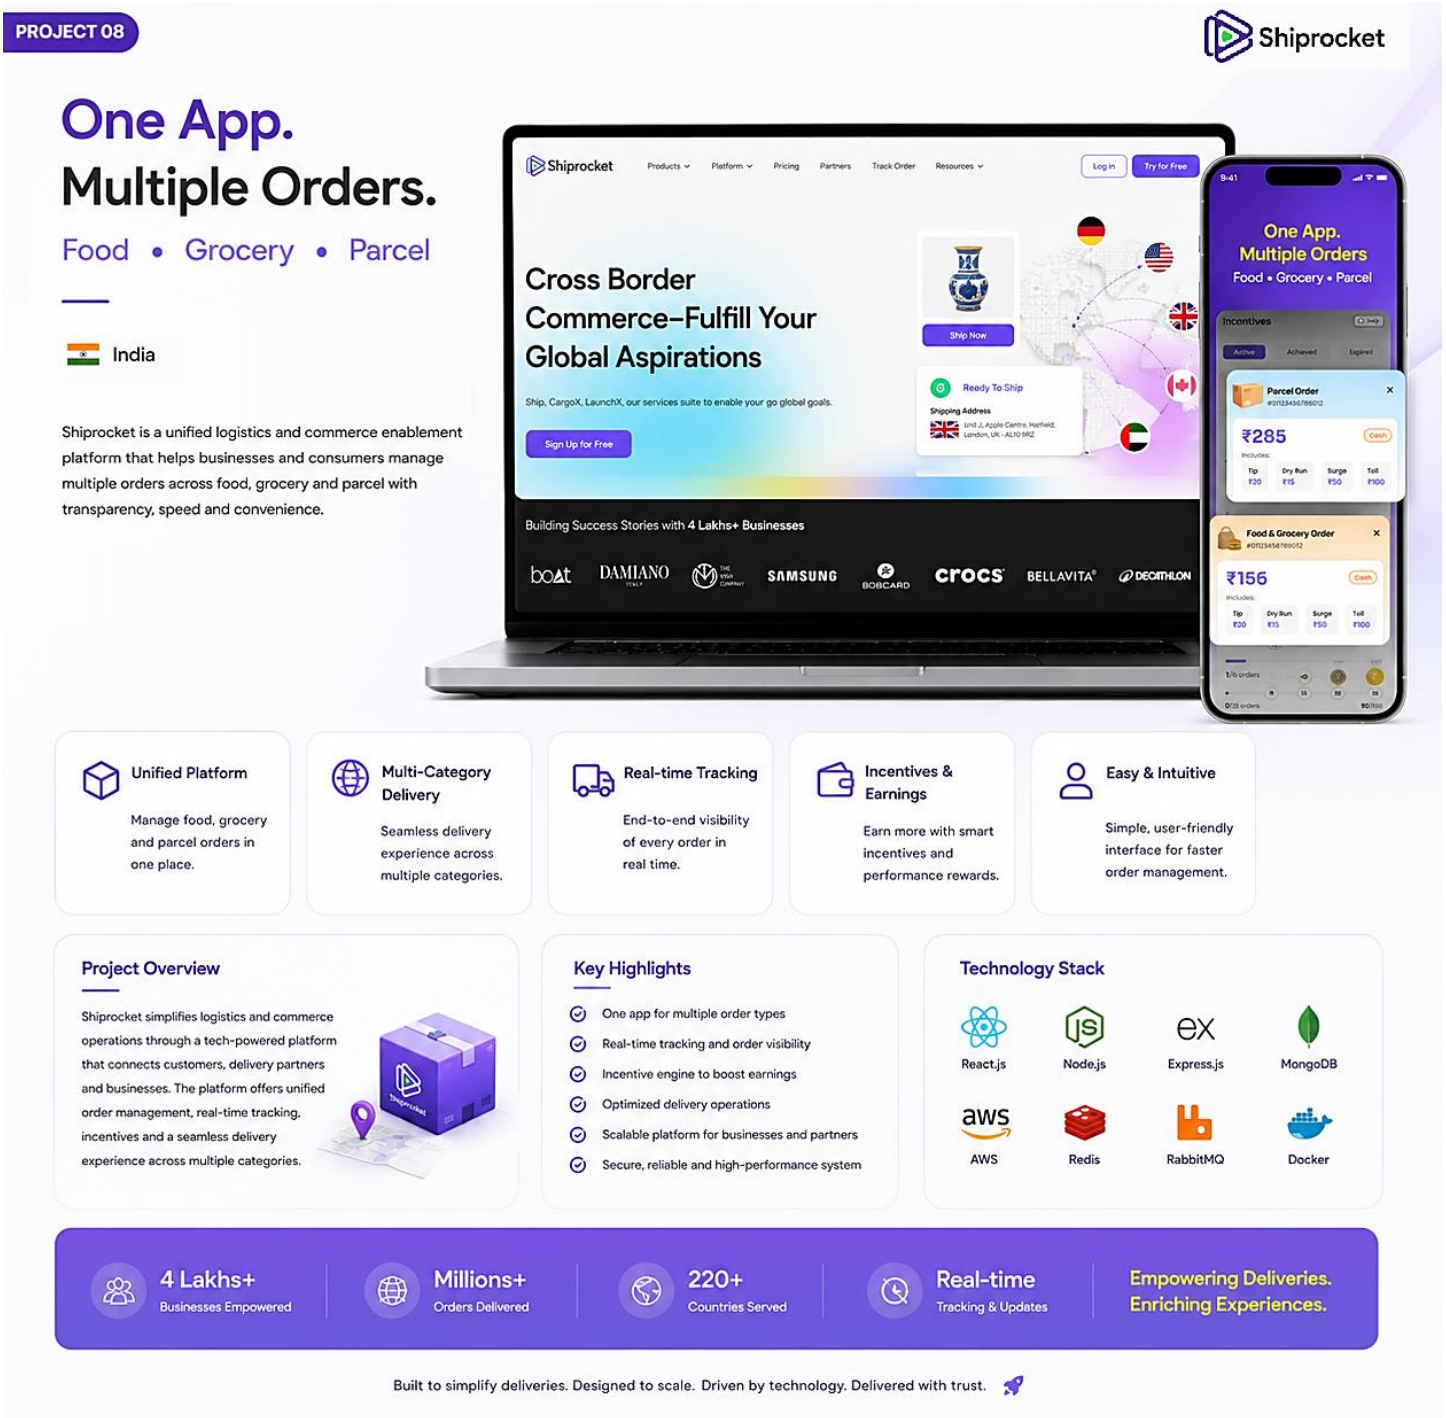
Empowering Farmers. Enriching Lives.

3.5 Driving Smart Mobility & Logistics

Connecting People, Assets, and Operations Through Intelligent Digital Solutions.

Redefining mobility and logistics by improving operational efficiency, real-time visibility, and service delivery. Spikedace develops intelligent digital platforms that streamline transportation, fleet operations, visitor management, asset tracking, and logistics workflows through secure, scalable, and data-driven solutions. Our solutions help organizations optimize operations, enhance user experiences, and enable smarter, connected mobility ecosystems.



PROJECT 09

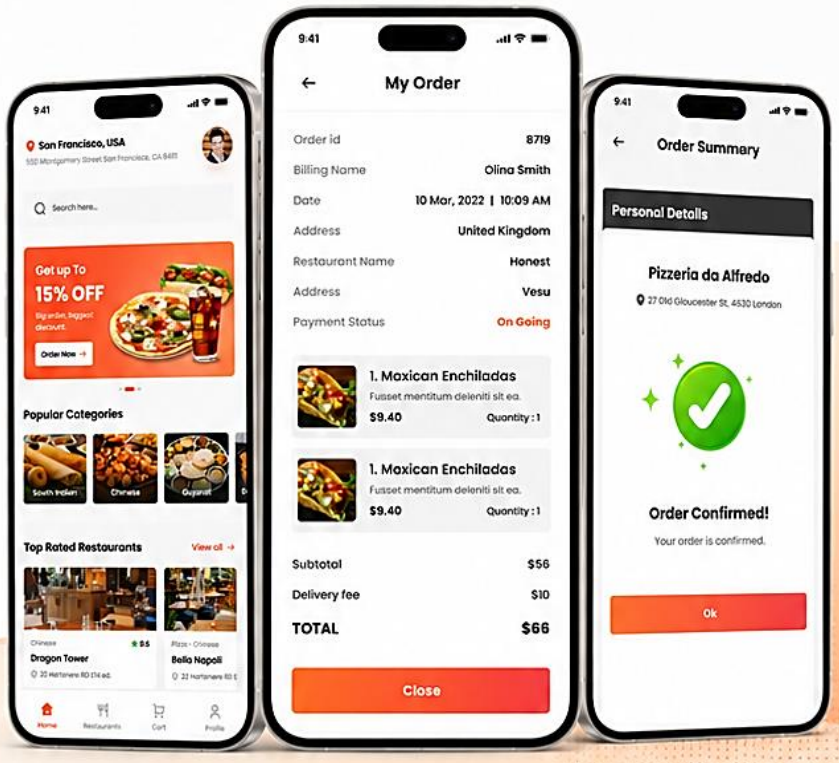
3SquareApp
Corporate Meal Platform

Corporate Meal Platform

Smarter Workplace Dining. Simplified.

Nigeria

A mobile-first corporate meal platform enabling employees to discover restaurants, place orders, manage corporate meal benefits, and enjoy a seamless workplace dining experience through an intuitive and secure mobile application.



Restaurant Discovery

Browse nearby restaurants and cuisines easily.

Meal Ordering

Quick and convenient food ordering in just a few taps.

Corporate Meal Benefits

Manage employee meal benefits and entitlements.

Live Order Tracking

Real-time order status from confirmation to delivery.

Secure Digital Payments

Safe, fast and reliable digital payment experience.

Project Overview

3SquareApp modernizes corporate dining by connecting employees, restaurants, and organizations through a unified mobile platform. The solution streamlines meal ordering, payment, delivery tracking, and employee meal benefit management—enhancing convenience, satisfaction, and operational efficiency.

Key Highlights

- Mobile-first user experience
- Corporate meal and benefit management
- Wide restaurant network and marketplace
- Real-time order tracking and notifications
- Secure payments and order confirmation
- Scalable and high-performance platform

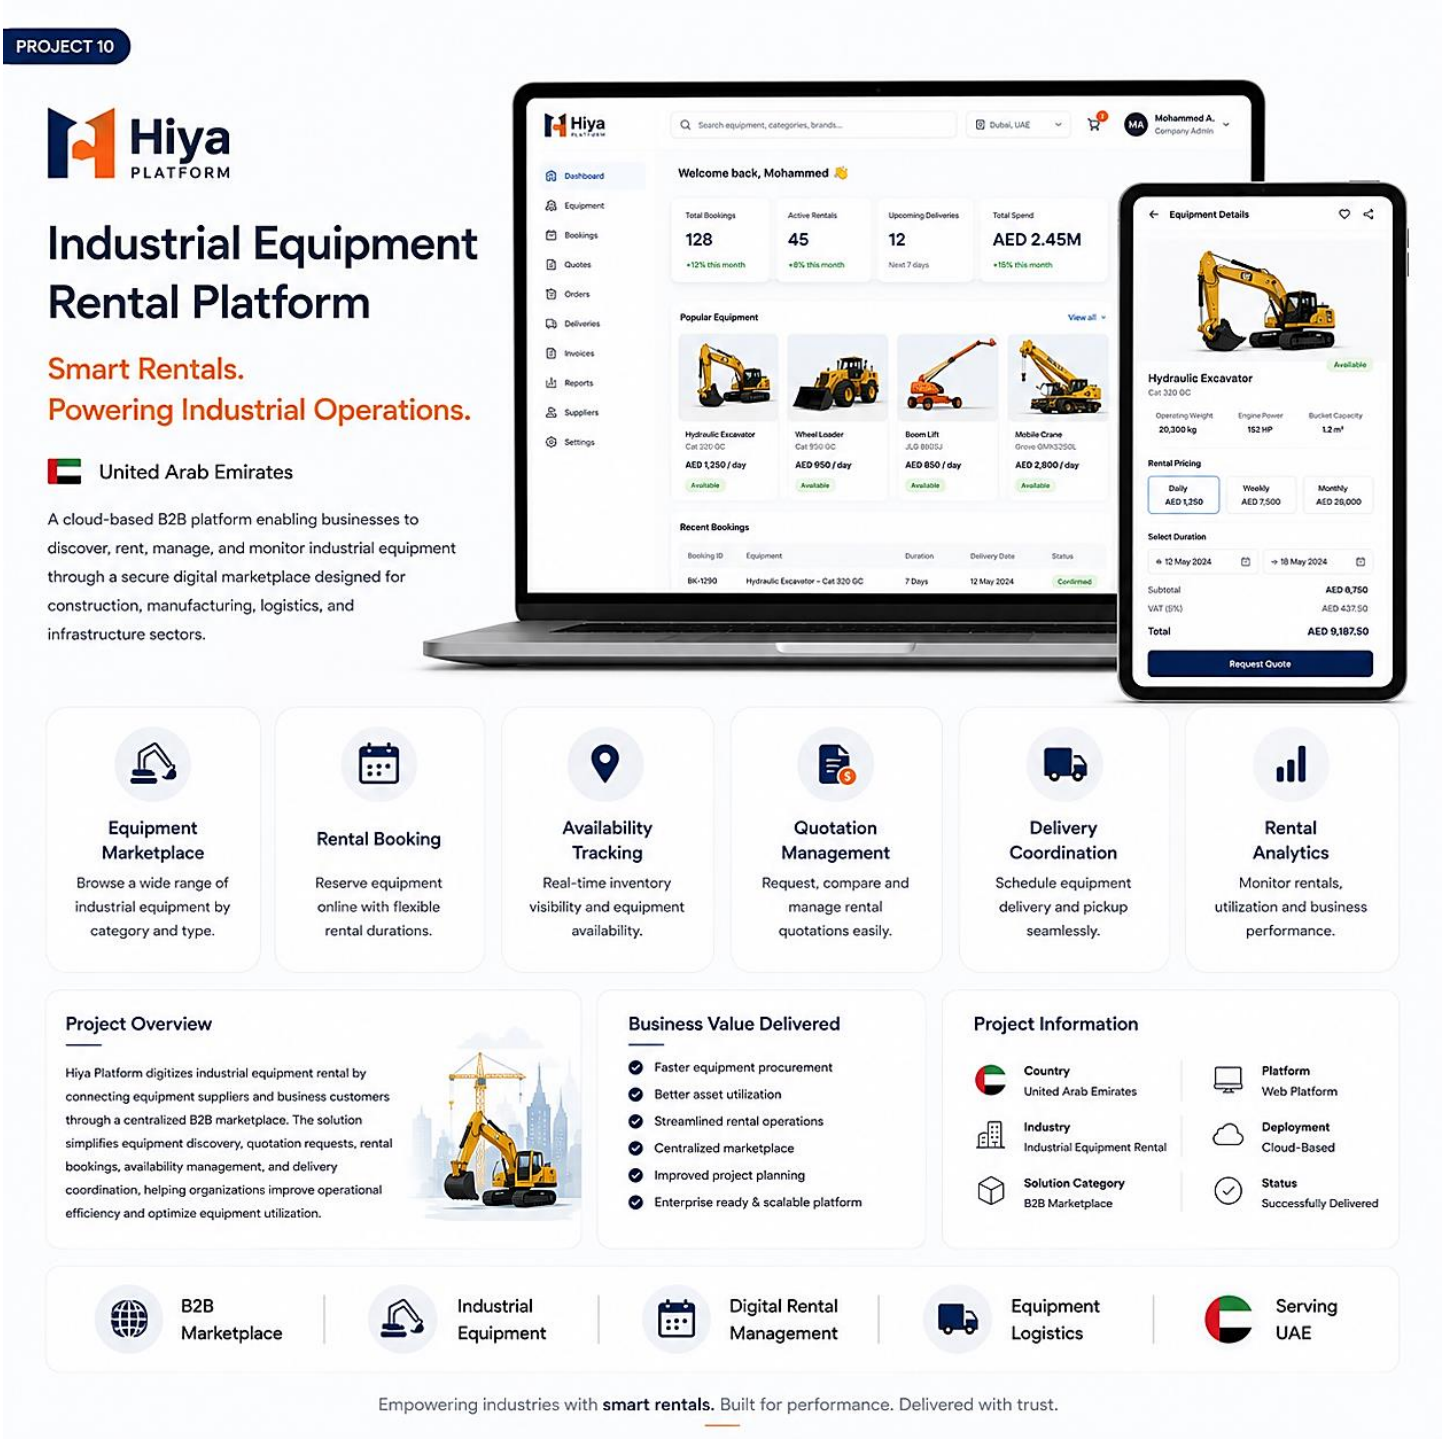
3.6 Enabling Digital Commerce

Powering Seamless Digital Commerce and Customer Experiences.

Digital commerce is transforming how businesses connect with customers, manage operations, and deliver products and services. Spikedace develops scalable eCommerce, marketplace, and digital ordering platforms that streamline transactions, enhance customer engagement, and optimize fulfillment. Our solutions empower organizations to accelerate growth, improve operational efficiency, and deliver seamless experiences across web and mobile channels.



PROJECT 11

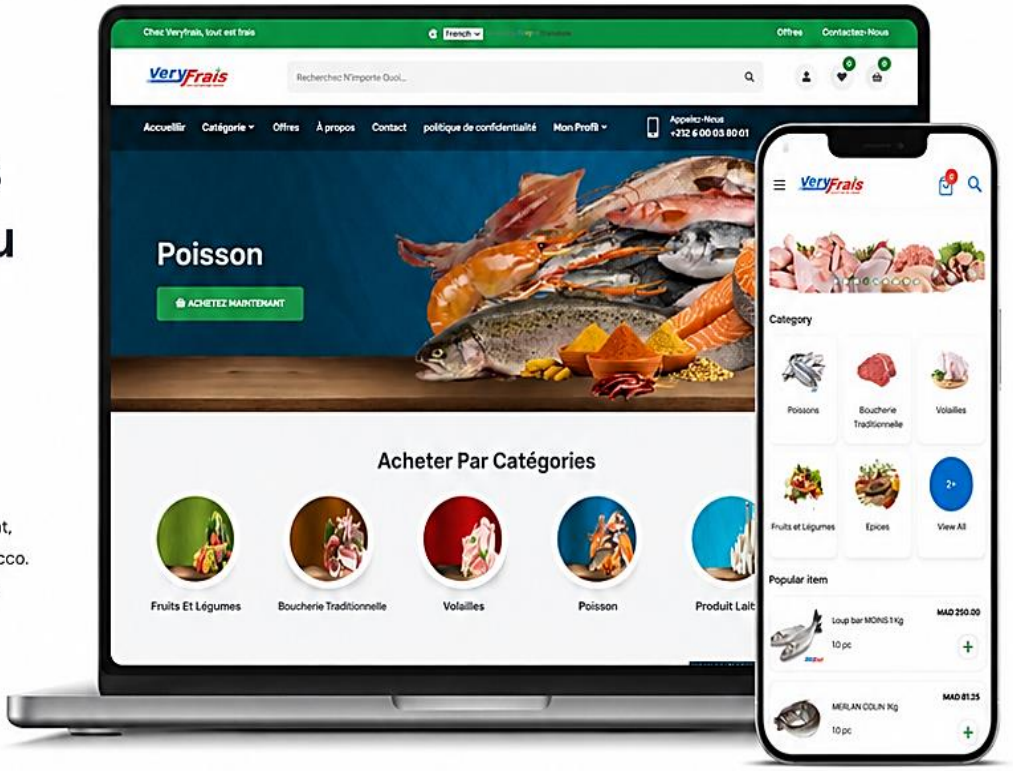
VeryFrais
Tout est frais chez nous

Fresh Groceries Delivered to You

Quality. Freshness. Convenience.

Morocco

VeryFrais.com is an online grocery platform delivering the freshest fruits, vegetables, meat, poultry, fish, and dairy products across Morocco. We connect customers with quality products and fast, reliable delivery.



Wide Product Range
Shop fruits, vegetables, meat, poultry, fish, dairy and more.

Quality Assured
Carefully sourced products to ensure freshness and quality.

Fast Delivery
Quick and reliable delivery across major cities.

Best Offers
Exclusive deals and discounts on your favorite products.

Secure Shopping
Safe payments and secure personal information.

Customer Support
Dedicated support to help you 24/7.

Project Overview

VeryFrais.com is a modern eCommerce platform that makes grocery shopping simple and convenient. It offers a seamless experience for browsing, ordering, and receiving a wide range of fresh products at the best prices with easy navigation and secure checkout.

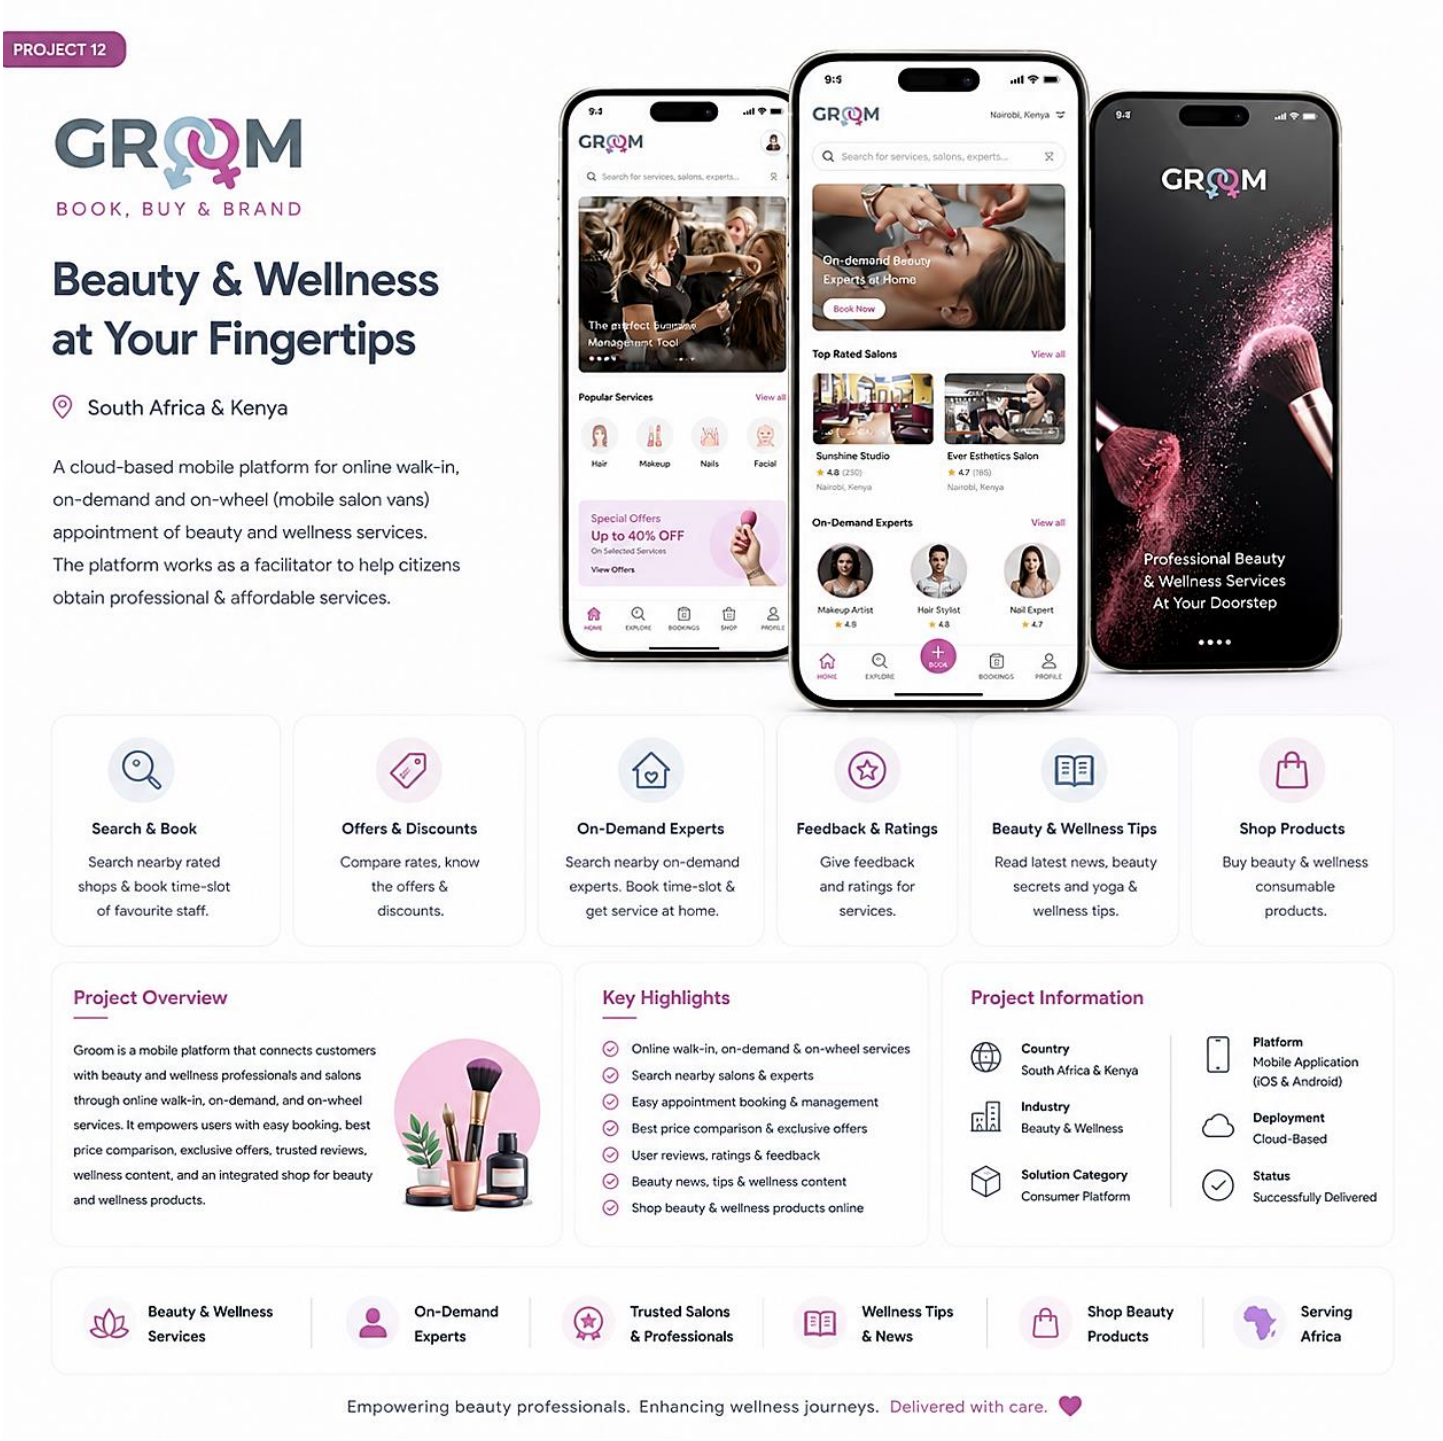
3.7 Accelerating Enterprise Digital Transformation

Empowering Organizations Through Intelligent Digital Solutions.

Enterprise digital transformation is reshaping how organizations operate, collaborate, and deliver value through connected technologies. We develop scalable enterprise platforms that automate business processes, improve operational efficiency, strengthen workplace collaboration, and enhance decision-making. Our solutions enable organizations to build agile, secure, and future-ready digital workplaces that support sustainable growth and innovation.



PROJECT 13

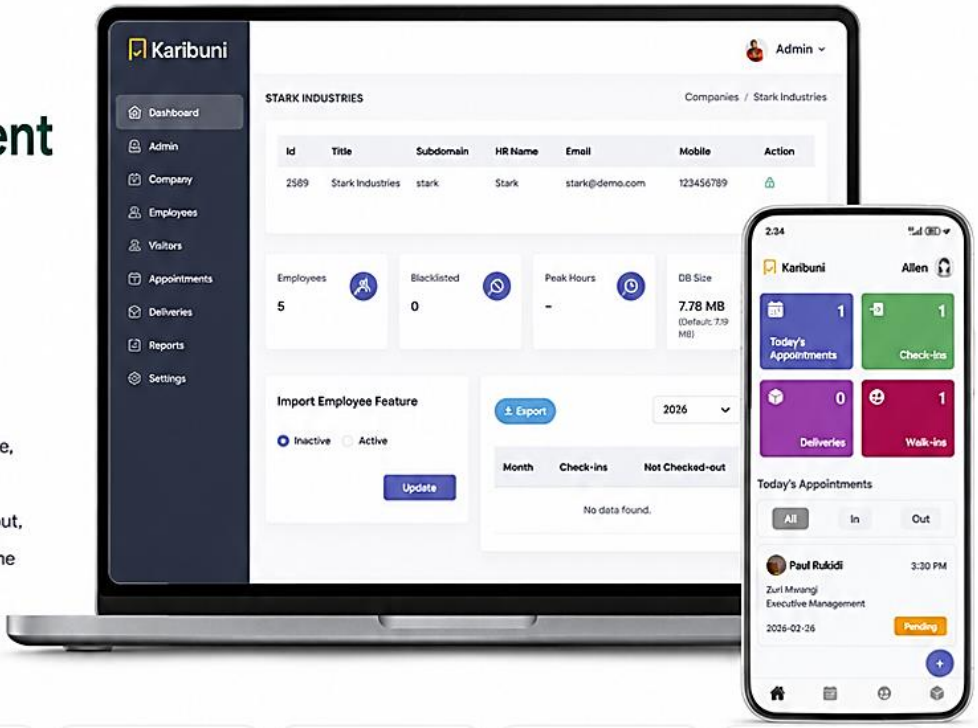
Karibuni

AI-Powered Visitor Management Solution

Smart. Secure. Seamless.

Benin

Karibuni is an AI-powered, cloud-based Visitor Management Solution (VMS) that ensures secure, scalable, and efficient visitor handling across organizations. From pre-registration to check-out, it streamlines every step while delivering real-time insights and a seamless experience for visitors, staff, and administrators.



Role-Based Access

Secure dashboards for Super Admin, HR/Admin, Department Heads, Officers, Executives and Visitors.

AI Intelligence

Smart notifications, automated tracking and predictive analytics for operational insights.

Cloud SaaS

Scalable, accessible anytime, anywhere with automatic updates and high availability.

Unified Workflows

Streamlined visitor journey from pre-registration to check-out.

Security & Compliance

OTP verification, ID uploads and audit-ready logs ensure compliance and data security.

Analytics & Reports

Real-time dashboards and reports for better decision-making and operational efficiency.

Project Overview

Karibuni digitizes and simplifies visitor management across organizations. It supports walk-in, pre-registered and on-demand visitors while providing role-specific dashboards, mobile apps, and real-time analytics. The solution improves security, transparency and productivity while ensuring a seamless experience for both visitors and staff.

Key Highlights

- Online walk-in, on-demand & on-wheel services
- Search nearby salons & experts
- Easy appointment booking & management
- Compare rates, offers & discounts
- Real-time notifications & SMS alerts
- Visitor check-in/out with QR / OTP

3.8 Under Development Projects

Innovating the Next Generation of Digital Solutions.

Spikedace continues in innovative digital platforms that address emerging business challenges across mobility, on-demand services, industrial intelligence, and enterprise transformation. The following projects represent our active innovation pipeline, showcasing next-generation solutions currently under development to deliver scalable, AI-enabled, and future-ready digital ecosystems for global markets.

Qiva One — Benin

Super App for Mobility, Delivery & Rental Services

Qiva One is a modular, AI-enabled mobility platform that unifies ride-hailing, goods delivery, and vehicle rental services within a single digital ecosystem. Designed with enterprise-grade scalability, real-time tracking, intelligent dispatch, loyalty programs, and advanced analytics, the platform enables businesses to launch and manage multiple transportation services through one centralized solution.

Efo — Ghana

Digital Marketplace for Home Services

Efo is a mobile-first marketplace connecting households with verified professionals across plumbing, electrical, cleaning, maintenance, and smart-home services. The platform integrates real-time booking, digital payments, transparent pricing, customer reviews, geo-location, and skill verification to create a trusted, efficient, and scalable home services ecosystem.

AI-Enabled Industrial Intelligence

Next-Generation AI Platform for Industrial Operations

An AI-powered industrial intelligence platform designed to enhance predictive maintenance, equipment health monitoring, digital twins, computer vision inspections, intelligent asset performance management, safety monitoring, and real-time operational analytics. By combining AI with industrial expertise, the platform aims to improve equipment reliability, optimize maintenance planning, increase operational efficiency, and support data-driven decision-making across complex industrial environments.

4. Client Testimonials

Delivering Value. Earning Trust.

At Spikedace, every digital transformation journey is built on trust, collaboration, and measurable outcomes. We are privileged to partner with governments, enterprises, educational institutions, financial organizations, healthcare providers, and development partners across multiple countries. Their continued confidence reflects our commitment to delivering secure, scalable, and impactful technology solutions that create lasting value.

⭐ Learning Management System (LMS)

"Spikedace demonstrated exceptional professionalism and technical expertise throughout the implementation of our Learning Management System. Their team delivered a scalable solution that significantly improved digital learning accessibility."

Mr. Lawrence
Director of ICT

⭐ RMI Class

"The platform exceeded our expectations in terms of usability, performance, and scalability. Their collaborative approach ensured successful delivery while adapting to evolving business requirements."

Mr. Brice
Managing Director

⭐ VeryFrais

"Our digital commerce platform transformed the customer shopping experience. Spikedace delivered a modern, reliable solution that supports our continued business growth."

Mr. Sadraoui, Moroccow
Operations Manager

⭐ Hiya Platform

"The industrial equipment marketplace provides a seamless digital experience for equipment owners and renters. The platform is intuitive, secure, and built for enterprise-scale operations."

Mr. Mohamed
Business Development Head

⭐ Karibuni

"Karibuni modernized our visitor management process with a secure & intelligent platform. The solution improved operational efficiency while strengthening organizational security."

Mr. Bunjo
Project Director

Let's Build Better Futures, Together.

Every successful digital transformation begins with a bold vision and the right technology partner. At Spikedace, we combine strategy, innovation, and engineering excellence to help governments, enterprises, and organizations transform ideas into impactful digital solutions. We look forward to collaborating with you to build secure, scalable, and future-ready technology that creates lasting value.
